To Research Personnel accessing Bass or Gilbert buildings during Stage 0 for essential or minimum basic research operations:

This is a reminder of critical policies that have been put in place to ensure your own safety and the safety of other researchers who are using research facilities. While working on campus, you are expected to adhere to these policies.

1. I will complete the Stanford health check website before coming to campus, and will not work on campus if I am sick. If I develop any symptoms while at work I will leave, contact my primary care provider, and follow Stanford guidance on self-reporting and self-isolation.
2. I will follow guidelines for hand washing and work-place cleaning outlined in the online course I completed, EHS-2470-WEB COVID-19, and on the Stanford COVID-19 Health Alerts website.
3. I will wear face covering at all times when working in a building on Stanford Campus.
4. I will adhere to 6 ft. minimum social distancing guideline at all times.
5. I will only access the buildings and spaces which I am authorized to enter following the work schedule established by my PI/supervisor and will not provide building access to anyone else.
6. I will follow schedules and guidelines established on my floor when accessing common equipment areas.
7. I will not use any common food-storage, cooking or eating areas, but understand that all sinks in ‘kitchen’ areas may be used for hand washing and filling of personal containers for drinking.
8. I will not use building conference rooms unless this access has been specifically approved.
9. I understand that all bathrooms are now for single use. I will use posted signs to designate occupancy and will not congregate near bathrooms.
10. I understand that all elevators must be occupied by a single person with priority given to those transporting large items.
